

Our goal

Customer awareness of the products she buys

Advantages and technical specifications:

- 1. Wheel bearings are 12 in number and high quality with long life**
- 2. The seat space is three centimeters wider than similar wheelchairs**
- 3. Wheels rims with a diameter of 20 cm, for more strength and life, a blade has been added and a metal bush bearing housing has been installed in the axial hole. Therefore, the bearing housing does not expand.**
- 4. Wheelchair load bearing test up to 130 kg And load bearing on the pedal 60 kg To prevent wheelchair damage while getting on.**
- 5. Displacement is made with the possibility of retracting the wheelchair.**
- 6. Rotating front wheels with two metal (not plastic) branches for strength and long life.**
- 7. The brakes can be set manually and permanently.**

Three-function wheelchair in retractable mode for transportation

Packed size

Height 800cm/Width 23cm/

It locks in retracted position and is easily transported

Maximum load test with 150 kg while working mode wheelchair
